

EPAM Testing-as-a-Service, Powered by Sauce Labs

Sauce Labs and EPAM join forces to help organizations get code to value fast from investments in test automation.

Quality Engineering Excellence
from 1000's of Engagements

EPAM's Testing as a Service is enabled by their industry-leading Test IO platform and powered by 10K+ full-time software testing professionals + 400K crowdtesters.

THE CHALLENGE

60% of test automation projects fail due to a lack of expertise, planning, strategy, tooling and framework implementations. It's a people, process and technology challenge that is widespread across the industry.

Digital confidence is complex and requires the right technology, expertise, and processes – expertise that EPAM has from 1000's of successful test automation engagements.

PEOPLE & PROCESS CHALLENGES	TECHNOLOGY CHALLENGES
<ul style="list-style-type: none">• Test coverage• Test strategy• Skilled test automation engineers• Training to kick-start test automation	<ul style="list-style-type: none">• Selecting the right tools• Unstable testing environment• Devices not readily available• Running tests at scale

KEY BENEFITS

- End-to-end turnkey test automation solution, from assessment to implementation
- Fast time to value, with test automation live on the Sauce grid in as little as a month
- Cross competency testing which leverages the right skills & devices on-demand
- Outcome-based model ensuring quality and bound by SLAs for guaranteed performance

SOLUTION

Sauce Labs and EPAM have combined forces to create a scalable end-to-end Testing As a Service (TaaS) offering that helps customers reduce testing costs, accelerate release velocity, and deliver quality applications.

EPAM TaaS automation implementations are built to run natively with Sauce Labs as the test execution platform, enabling code to value fast and ensuring your investment in automation has a meaningful impact on your business.

Sauce Labs provides the most comprehensive and trusted continuous testing cloud. Sauce Labs delivers a 360-degree view of a customer's application experience, ensuring that web and mobile applications look, function, and perform exactly as they should on every browser, OS, and device, every single time.

- Comprehensive cross-browser testing cloud helps teams to test their apps and websites across thousands of desktop and mobile browser/OS combinations
- Real device cloud and mobile emulators/ simulators enable teams to cover the entire breadth of mobile use cases, provide the widest cross-device coverage, and offer robust test insights for live and automated testing, so they can accelerate mobile app releases.

EPAM TaaS program enables agile software development teams to call on the skill and insights of more than 400K QA professionals - on-demand - to scale up unbiased QA testing on real devices throughout the development cycles.

The infographic features the EPAM logo in the top right corner. On the left, four red circular icons represent service benefits: a gear for 'Fully governed service: the right resources for the problem, including QA management', a lightbulb for 'Outcome-based model, with exceptionally high standards for quality', a magnifying glass for 'Ability to spike capacity', and a hand cursor for 'Easy buy though service points model'. On the right, a central blue ring contains the text 'TEST TYPES SUPPORTED'. Surrounding this ring are six test types: 'Accessibility Testing', 'Test Automation', 'Test Case Authoring & Execution', 'Load & Performance Testing', 'UX Testing', and 'Exploratory Testing'.

The combination of best- in- class global testing expertise and the world’s largest cloud- based test platform are driving high- value business outcomes at scale.

CUSTOMER SUCCESS

EPAM and Sauce Labs are delivering high value end-to-end solutions with industry leading enterprises in the Retail, Financial Services, T&H, Pharmaceutical, Cosmetic, Automotive and Technology sectors. Together they’re helping companies improve test coverage, prevent production defects, and ensure users across all devices and browsers enjoy great software experiences.
