New business attributed to improved testing

\$1.1M

Delivery team productivity

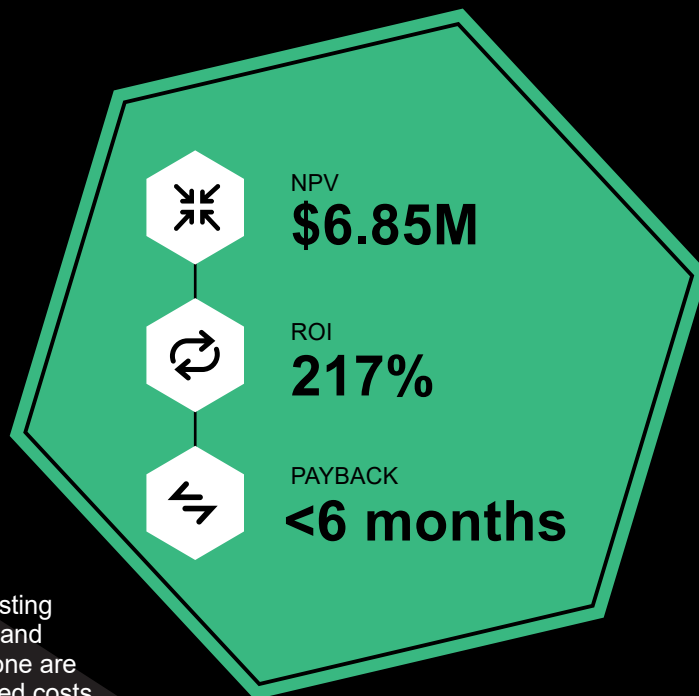

\$4.1M

Savings on testing infrastructure and operations

\$1.3M

Benefits

Savings on testing infrastructure and operations alone are **2.6X** associated costs

SAUCE LABS BY THE NUMBERS

95% reduction in software issues

90% developer time savings when fixing issues

90% time savings for QA by automating testing

VOICE OF THE CUSTOMER

“[Sauce Labs] gives you confidence in the definition of ‘done’ — so that the teams that are in high pressure situations can deliver software quicker, faster, and more iteratively.”

Manager of software test engineering, technology

“We are catching a lot more [issues] in QA, [which is] great. ... When [code] comes into our test environment, there’s nothing that’s being ‘thrown over.’ ... The defects are getting found earlier on, and we are finding a lot more.”

VP of IT quality assurance, financial services

“Since we can parallelize the tests, they run very fast. We’re covering hundreds of tests in under about 20 minutes. [I have heard from QA] nothing but good things about the mobile capabilities, especially compared to what we were using previously, so the [QA] teams are liking it.”

Director of enterprise QA, financial services
