Premium Consulting Services

Empower every customer to release quality software with confidence

Our Sauce Labs Professional Services are designed to help you reach your software quality goals by providing strategic expertise, hands-on guidance, and continuous skills development. We help you assess, optimize, and scale your test automation frameworks using the full power of the Sauce Labs platform.

KickStart Services

Tailored Onboarding & Configuration:
Set up Sauce Labs accounts, integrate with existing CI/CD pipelines, and configure test suites.

Reporting & Analytics Setup:
Implement custom dashboards and reports for enhanced visibility into test results

OUTCOME   Implementation of Best Practices from onset. Utilizing support and processes for streamlining troubleshooting and add-on services.

Framework Fit Check

Framework configuration best practices (Appium, Selenium, Cypress, etc.)	Environment setup (Sauce Connect, local tunnels, real device config)	Parallel execution, platform coverage, retry strategies	Help integrate Sauce Labs into CI/CD (Jenkins, GitHub Actions, etc.)	Address anti-patterns in test design (e.g., brittle locators, hardcoded waits)

OUTCOME   Identify quick wins and avoid common pitfalls in framework setup

Optimization Sprint

Full framework maturity assessment	Flaky test review and stabilization guide	Test architecture improvement plan	Custom CI/CD strategy with Sauce Labs	Up to 24 hours of implementation consulting	One virtual advisory session 12-month period Two-hour sessions

OUTCOME   Streamlined, scalable, and maintainable automation pipeline

Test Engineering Transformation

Multi-team framework assessments Selenium, Appium, Cypress, etc.	Test execution benchmarking across devices/browsers	Custom dashboards and test reporting strategy	Deep CI/CD integration across pipelines	Two full-day advisory sessions Appium/Selenium hands-on	Dedicated consultant One-hour weekly syncs 12-month period

OUTCOME   Production-grade automation maturity and long-term strategy alignment

	Get it right the first time	Leveraging our testing advisors lets you execute your testing strategy the right way.
	Get up and running quickly	Testing experts provide an initial setup consultation, implementation, and ongoing test planning so teams can quickly start using the platform.
	Validate your processes	Ensure your Sauce Labs instance is integrated with current processes for the most efficient software testing.
	Be experts in software testing	Hands-on training sessions using your team's data and workflows ensure they become Sauce Labs experts.
	Level up your software testing	Technical workshops can get your teams to the next level of automation, from optimizing CI/CD to parallelization best practices.
