Sauce Labs Promise

“Continuous Integration and Continuous Delivery are crucial for any product to provide customer value. Integrating Sauce Labs automated testing into the CI/CD pipeline accomplishes high product quality at every step.”

Platform for Test
The only platform with a robust test infrastructure and complete suite of testing tools for every stage of the SDLC. Trusted by top enterprises and recognized as an IDC market leader.

Test Expertise
Founded by Selenium and Appium creators, we bring unmatched test expertise and top-notch customer support. Join the Sauce Community for guidance from world-class testing experts.

Coverage at Scale
With over 6 billion tests run, 1700+ emulators and simulators, support for 7500+ real devices, and 900+ browsers, we provide unrivaled scale and coverage. Run thousands of tests in parallel with your framework of choice.

Security & Compliance
We ensure the highest security and data protection standards from our US HQ, holding certifications including, SOC 3, SOC 2 Type 2, ISO 27001, and ISO 27701, as well as GDPR, CCPA, and HiPAA compliance.

Intelligent Insights
AI-driven insights, customized reports, and failure analysis empower continuous improvement and intelligent debugging across the SDLC.

Faster Test Execution
Achieve unprecedented test speeds with 70x faster test execution with Sauce Orchestrate, along with a 10x speed boost through parallel testing.
